

DATA SCIENTIST – MACHINE LEARNING

Company: TechNova Analytics

Location: Bangalore / Hyderabad

Employment Type: Full-time

ABOUT THE ROLE

We are looking for a Data Scientist to join our data and analytics team. The candidate will work on statistical analysis, machine learning, predictive modeling, and data-driven business solutions.

The ideal candidate should have a strong foundation in statistics, programming, and machine learning and should be able to work with real-world datasets.

KEY RESPONSIBILITIES

- Collect, clean, preprocess, and analyze structured and unstructured datasets.
- Perform exploratory data analysis to identify patterns, trends, and relationships.
- Develop, train, and evaluate machine learning models for classification and regression problems.
- Apply statistical techniques to solve business problems and support data-driven decisions.
- Perform feature engineering and feature selection.

- Evaluate model performance using appropriate statistical and machine learning metrics.
- Communicate analytical findings and model results clearly to technical and non-technical stakeholders.
- Collaborate with data engineers, software engineers, and business teams.
- Build and maintain data science prototypes and applications.

REQUIRED QUALIFICATIONS

- Bachelor's or Master's degree in Statistics, Mathematics, Computer Science, Data Science, or a related field.
- Strong knowledge of probability and statistics.
- Good programming skills in Python.
- Strong knowledge of Pandas and NumPy.
- Understanding of machine learning algorithms.
- Experience with Scikit-learn.
- Knowledge of SQL and relational databases.
- Strong problem-solving and analytical skills.

- Ability to explain technical concepts clearly.

REQUIRED MACHINE LEARNING KNOWLEDGE

- Linear Regression
- Logistic Regression
- Decision Trees
- Random Forest
- K-Nearest Neighbors
- Clustering
- Principal Component Analysis
- Model Evaluation
- Cross-validation
- Feature Engineering

PREFERRED QUALIFICATIONS

- Experience with Natural Language Processing.
- Knowledge of Deep Learning.
- Familiarity with Large Language Models and Generative AI.
- Experience building RAG-based applications.
- Experience with Streamlit or similar application frameworks.
- Familiarity with Git and GitHub.
- Basic knowledge of cloud platforms such as AWS, Azure, or Google Cloud.

PROJECT EXPERIENCE

Candidates should be able to demonstrate practical experience through academic, personal, internship, or professional projects.

Experience working with real-world datasets and deploying machine learning models or applications will be considered an advantage.

WHAT WE ARE LOOKING FOR

- Strong statistical thinking.
- Ability to learn new technologies quickly.
- Curiosity and willingness to solve new problems.
- Good communication and teamwork skills.
- Ability to work independently.
- Attention to detail.

INTERVIEW PROCESS

The selection process may include:

1. Technical assessment
2. Statistics and probability interview
3. Machine learning interview
4. Python/SQL interview
5. Project discussion
6. HR/behavioral interview
